SWAG LABS APPLICATION TESTING

Functional & UI Test Report | Tutorial 10

Evidence-based report prepared from the five supplied screenshots

1. Test Overview

Module Name	Swag Labs Login, Products, Cart and Checkout
Test Case Group	TC-010
Tutorial	Tutorial 10
Tester Name	Not specified
Application / Pages	Swag Labs demo shopping application
Environment	Browser screenshots supplied; browser/OS versions not independently verified
Objective	Review the visible login, products, cart and checkout information screens.

2. Prerequisites

- A browser is available to open the Swag Labs demo application.
- The Swag Labs login page can be opened.
- Use authorized demo credentials for any live execution.
- The supplied screenshots are available for visual review.

3. Test Scenarios and Results

Scenario 10a — Inspect Swag Labs login page

Prerequisite: Swag Labs demo login page is available.

Test steps:
1. Open the Swag Labs login page.
2. Review Username and Password fields.
3. Review the LOGIN button.

Expected result: Username and Password fields and the LOGIN button are displayed.

Actual result / evidence: Screenshot 1 shows the Swag Labs login page with Username and Password fields and a red LOGIN button.

Status: Observed in screenshot

Scenario 10b — Inspect Products page

Prerequisite: A valid demo user has reached the Products page.

Test steps:
1. Open the Products page.
2. Review product names, descriptions and prices.
3. Check the Add to cart buttons and sorting control.

Expected result: Products are listed with their details, prices and Add to cart controls.

Actual result / evidence: Screenshot 2 shows Sauce Labs Backpack, Bike Light, Bolt T-Shirt and Fleece Jacket cards with prices and Add to cart buttons. A Name (A to Z) sorting control is visible.

Status: Observed in screenshot

Scenario 10c — Inspect cart contents and controls

Prerequisite: At least one product has been added to the cart.

Test steps:
1. Open the cart.
2. Review item names, quantities and prices.
3. Review Remove, Continue Shopping and Checkout controls.

Expected result: Selected items and cart controls are displayed correctly.

Actual result / evidence: Screenshot 3 shows Sauce Labs Backpack ($29.99) and Sauce Labs Bolt T-Shirt ($15.99), each with quantity 1, plus Remove, Continue Shopping and Checkout controls.

Status: Observed in screenshot

Scenario 10d — Inspect checkout information form

Prerequisite: The cart contains an item and Checkout has been selected.

Test steps:
1. Select Checkout from the cart.
2. Review the customer information fields.
3. Review Cancel and Continue buttons.

Expected result: The checkout information form shows First Name, Last Name and Zip/Postal Code fields with navigation controls.

Actual result / evidence: Screenshot 4 shows the Checkout: Your Information page with First Name, Last Name and Zip/Postal Code fields, plus Cancel and Continue buttons.

Status: Observed in screenshot

Scenario 10e — Review login with standard_user entered

Prerequisite: Swag Labs login page is available and demo credentials are authorized for testing.

Test steps:
1. Open the login page.
2. Enter the demo username standard_user.
3. Enter the corresponding demo password.
4. Review the login form before submission.

Expected result: The username and password fields accept input; successful authentication must be verified by submitting and checking the next page.

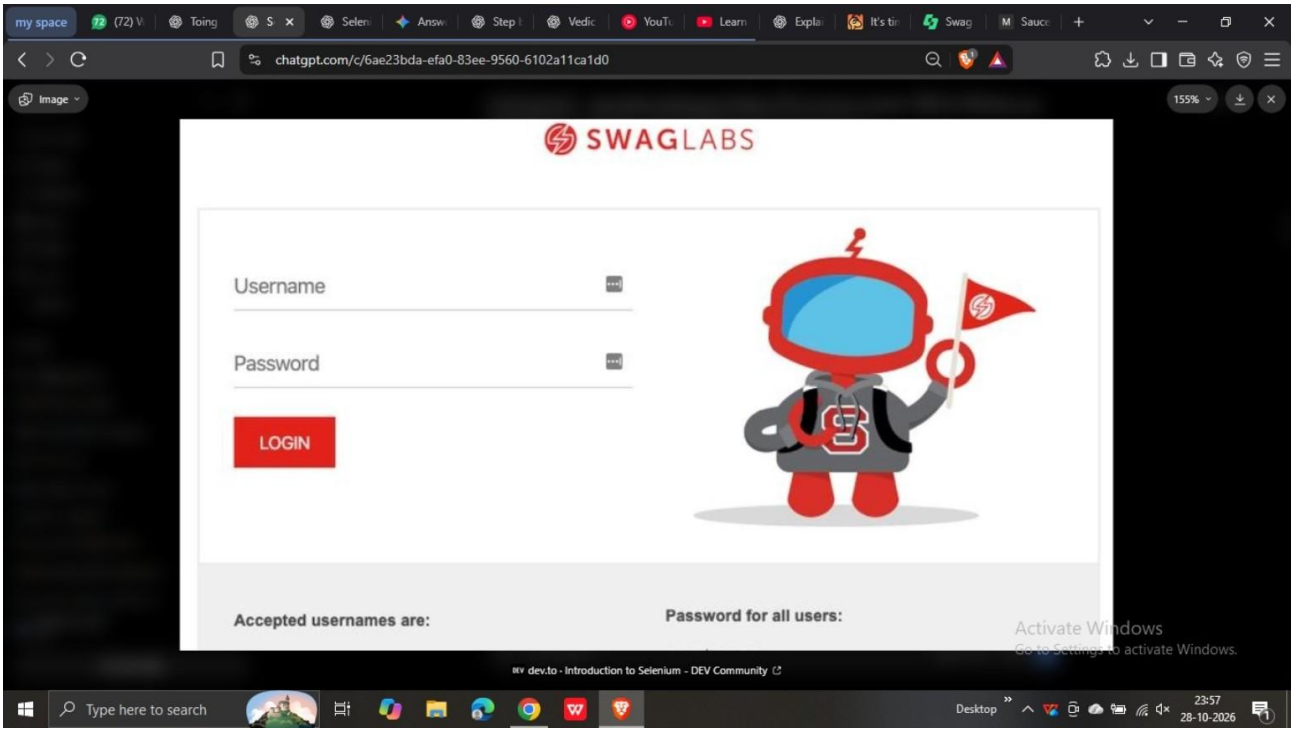

Actual result / evidence: Screenshot 5 shows standard_user in the username field and a populated password field. The screenshot does not prove that Login was submitted or authentication succeeded.

Status: Input observed; login result not verified

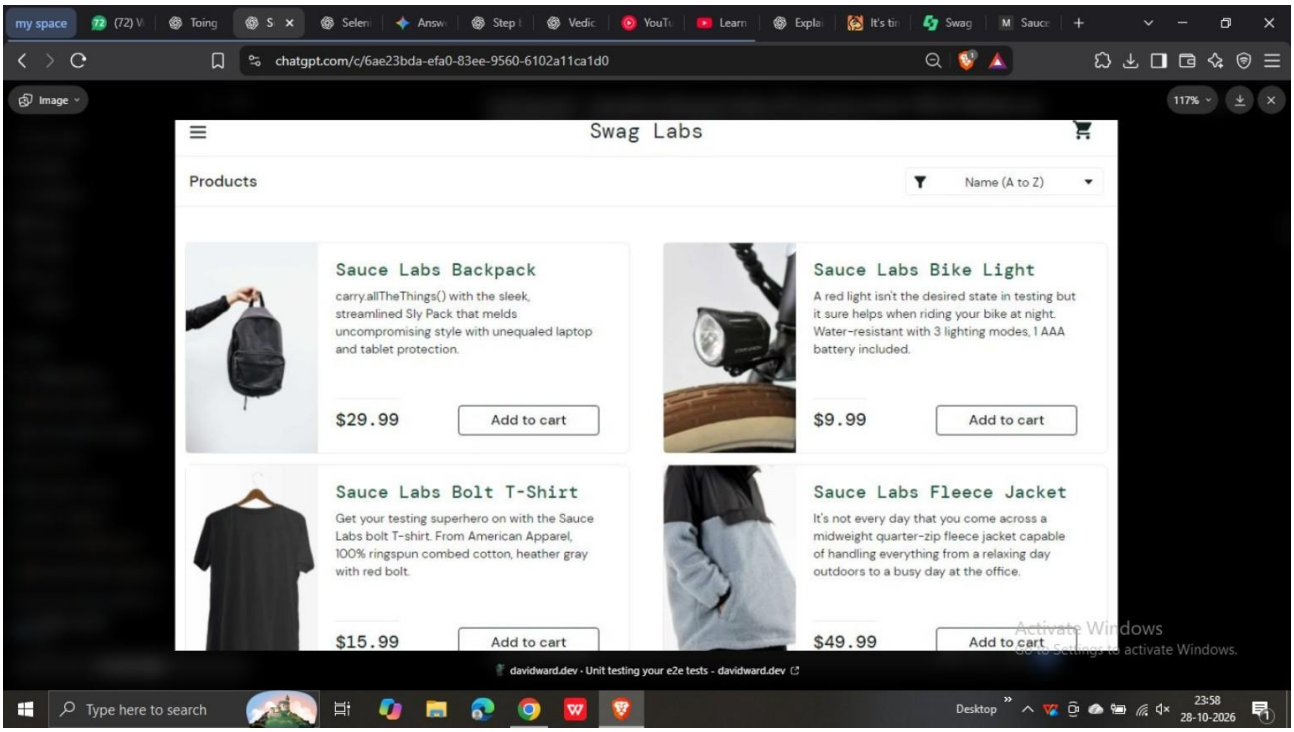

4. Screenshot Evidence — Sequence

The five screenshots are included in the order supplied. They show different Swag Labs pages and states. The images provide visual evidence only; they do not prove that all screens belong to one continuous end-to-end test run.

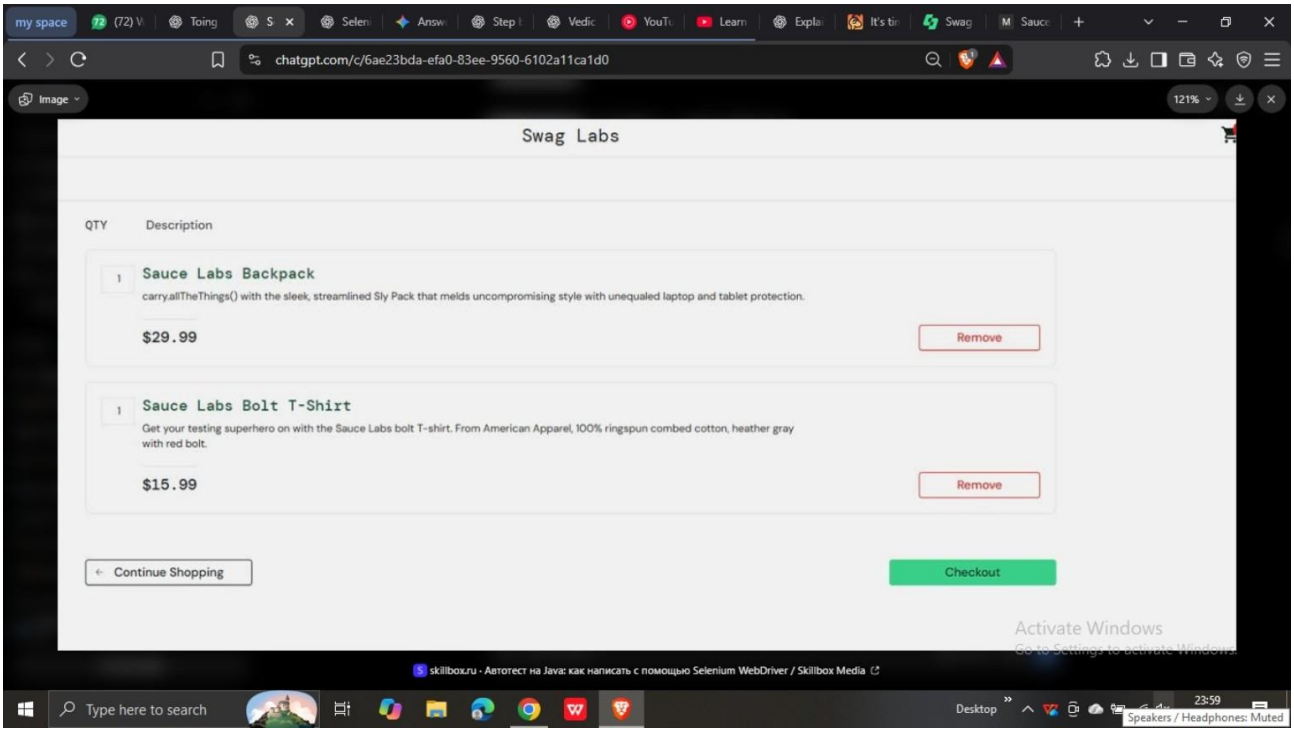

Screenshot 1 — Swag Labs login page with Username and Password fields

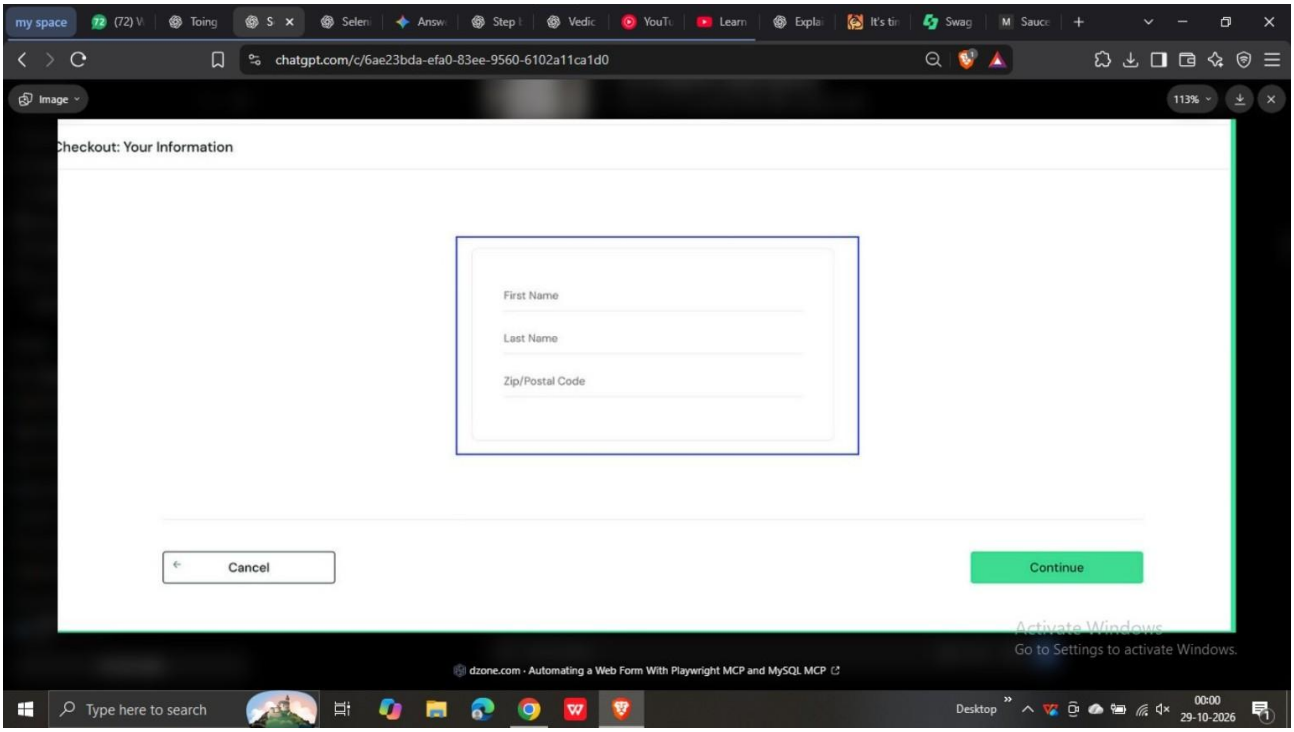

Screenshot 2 — Products page showing product cards, prices and Add to cart buttons

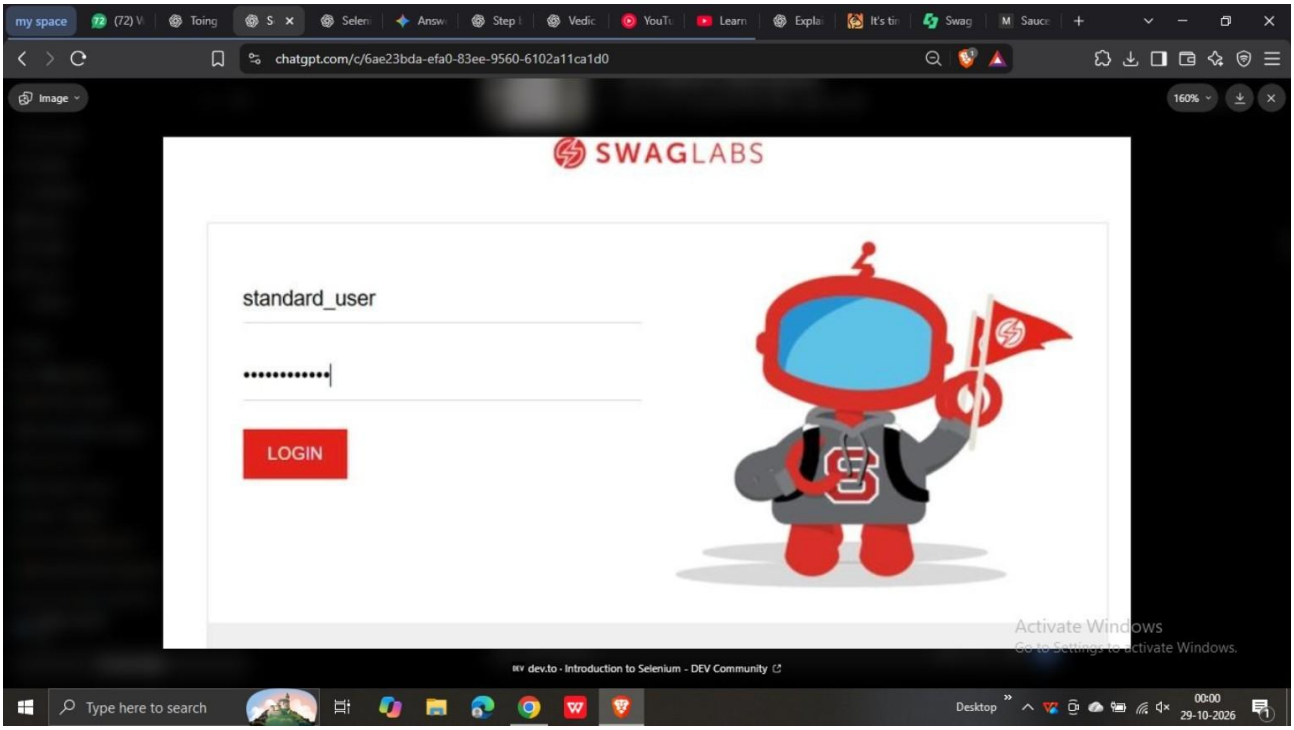

Screenshot 3 — Cart page showing selected items, Remove buttons and Checkout

Screenshot 4 — Checkout: Your Information form with First Name, Last Name and Zip/Postal Code

Screenshot 5 — Login page with standard_user entered and password field populated

5. Summary of Test Results

Metric	Count	Notes
Scenarios documented	5	Login, products, cart and checkout information screens
Screenshots reviewed	5	All five supplied screenshots included
Confirmed UI failures	0	No confirmed defect can be classified from screenshots alone
Requires independent verification	3	Successful login, Add to cart/cart updates, and checkout validation/continuation

6. Conclusion and Recommendations

The supplied screenshots show the Swag Labs login page, Products page, cart, checkout information form, and a login form with standard_user entered. These screenshots confirm that the displayed UI states were captured. They do not establish that login succeeded, cart actions updated correctly, or checkout completed.

Recommendation: run a clearly recorded test using authorized demo credentials. Log in, add a product to the cart, verify the cart, enter valid checkout information, continue to the next checkout step, and record each result. Capture before-and-after screens and avoid using real personal data.

7. Bug Reports

No confirmed UI defect is identifiable from the supplied screenshots. The images do not demonstrate a failure. Login submission, cart updates, required-field validation and checkout progression require direct testing before they can be marked passed or failed.
