BU

Module Name	Bugzilla and TestLink website UI
Test Case Group	TC-008
Tutorial	Tutorial 8
Tester Name	Not specified
Application / Pages	Bugzilla home and Advanced Search; TestLink landing page and footer
Environment	Browser screenshots supplied; browser/OS versions not independently verified
Objective	Review the visible Bugzilla and TestLink website screens and document observable UI states.

Test Case ID	Test Scenario	Preconditions	Test Steps
TC-008-01	Inspect Bugzilla home page	Browser is available and the Bugzilla website can be opened.	1. Open the Bugzilla website. 2. Review the home page header and navigation. 3. Identify the visible search and Try it out controls.
TC-008-02	Inspect Bugzilla Advanced Search results	Bugzilla search page is available.	1. Open or select Advanced Search. 2. Review the visible search results table. 3. Inspect bug IDs, summaries, products, components and statuses.
TC-008-03	Inspect TestLink home page	Browser is available and the TestLink website can be opened.	1. Open testlink.org. 2. Review the page title and product description. 3. Review the displayed version and download/repository links.

TC-008-04	Inspect TestLink support and footer links	TestLink website is open.	1. Scroll to the lower part of the TestLink page. 2. Review the Get Connected section. 3. Review support and third-party information.

UGZILLA & TESTLINK TEST CASES — TUTORIAL 8

Expected Result	Actual Result / Evidence	Status
Bugzilla home page and its main navigation, search and entry controls are displayed.	Screenshot 1 shows the Bugzilla logo, About, News, Download, Documentation, Support, Contribute and Follow Us navigation, search field, and a welcome panel with Documentation, Advanced Search, New Bug and Preferences icons.	Observed in screenshot
Advanced Search page displays search results in a readable table with bug details.	Screenshot 2 shows the Advanced Search section and a bug results table with columns including ID, Type, Summary, Product, Component, Assignee, Status, Resolution and Updated.	Observed in screenshot
TestLink landing page shows its product description and available resource links.	Screenshot 3 shows “TestLink Open Source Test Management”, version 1.9.20 - Rajin, and links for SourceForge, Bitnami Virtual Appliance, nightly fixes and Git Repository (GitHub).	Observed in screenshot

Footer displays available community, issue-reporting and support information.	Screenshot 4 shows Forum, Issues/Feature Request, LinkedIn and Twitter links, Help/Third Party Licenses/etc., the Oxygen XML Editor logo, and a copyright line for the TestLink Development Team 2013/2018.	Observed in screenshot

Priority	Remarks
Medium	Screenshot evidence only; direct execution required to verify behavior.

Metric	Count
Scenarios documented	4
Screenshots reviewed	4
Confirmed UI failures	0
Requires independent verification	3

Conclusion

Screenshots show the visible UI only; search, bug submiss

T SUMMARY REPORT — TUTORIAL 8

Notes
Bugzilla home/search and TestLink landing/footer screens
All four supplied screenshots included in the report
No confirmed defect can be classified from screenshots alone
Search behavior, issue/report workflow and TestLink links/navigation

ion and external link behavior need independent verification.
