BUGZILLA & TESTLINK APPLICATION TESTING

Functional & UI Test Report | Tutorial 8

Evidence-based report prepared from the four supplied screenshots

1. Test Overview

Module Name	Bugzilla and TestLink website UI
Test Case Group	TC-008
Tutorial	Tutorial 8
Tester Name	Not specified
Application / Pages	Bugzilla home and Advanced Search; TestLink landing page and footer
Environment	Browser screenshots supplied; browser/OS versions not independently verified
Objective	Review the visible Bugzilla and TestLink website screens and document observable UI states.

2. Prerequisites

- A browser is available to open the Bugzilla and TestLink websites.
- The supplied screenshots are available for visual review.
- Use only authorized accounts and test environments for any actions that require login or submitting data.

3. Test Scenarios and Results

Scenario 8a — Inspect Bugzilla home page

Prerequisite: Browser is available and the Bugzilla website can be opened.

Test steps:
1. Open the Bugzilla website.
2. Review the home page header and navigation.
3. Identify the visible search and Try it out controls.

Expected result: Bugzilla home page and its main navigation, search and entry controls are displayed.

Actual result / evidence: Screenshot 1 shows the Bugzilla logo, About, News, Download, Documentation, Support, Contribute and Follow Us navigation, search field, and a welcome panel with Documentation, Advanced Search, New Bug and Preferences icons.

Status: Observed in screenshot

Scenario 8b — Inspect Bugzilla Advanced Search results

Prerequisite: Bugzilla search page is available.

Test steps:
1. Open or select Advanced Search.
2. Review the visible search results table.
3. Inspect bug IDs, summaries, products, components and statuses.

Expected result: Advanced Search page displays search results in a readable table with bug details.

Actual result / evidence: Screenshot 2 shows the Advanced Search section and a bug results table with columns including ID, Type, Summary, Product, Component, Assignee, Status, Resolution and Updated.

Status: Observed in screenshot

Scenario 8c — Inspect TestLink home page

Prerequisite: Browser is available and the TestLink website can be opened.

Test steps:
1. Open testlink.org.
2. Review the page title and product description.
3. Review the displayed version and download/repository links.

Expected result: TestLink landing page shows its product description and available resource links.

Actual result / evidence: Screenshot 3 shows “TestLink Open Source Test Management”, version 1.9.20 - Rajin, and links for SourceForge, Bitnami Virtual Appliance, nightly fixes and Git Repository (GitHub).

Status: Observed in screenshot

Scenario 8d — Inspect TestLink support and footer links

Prerequisite: TestLink website is open.

Test steps:
1. Scroll to the lower part of the TestLink page.
2. Review the Get Connected section.
3. Review support and third-party information.

Expected result: Footer displays available community, issue-reporting and support information.

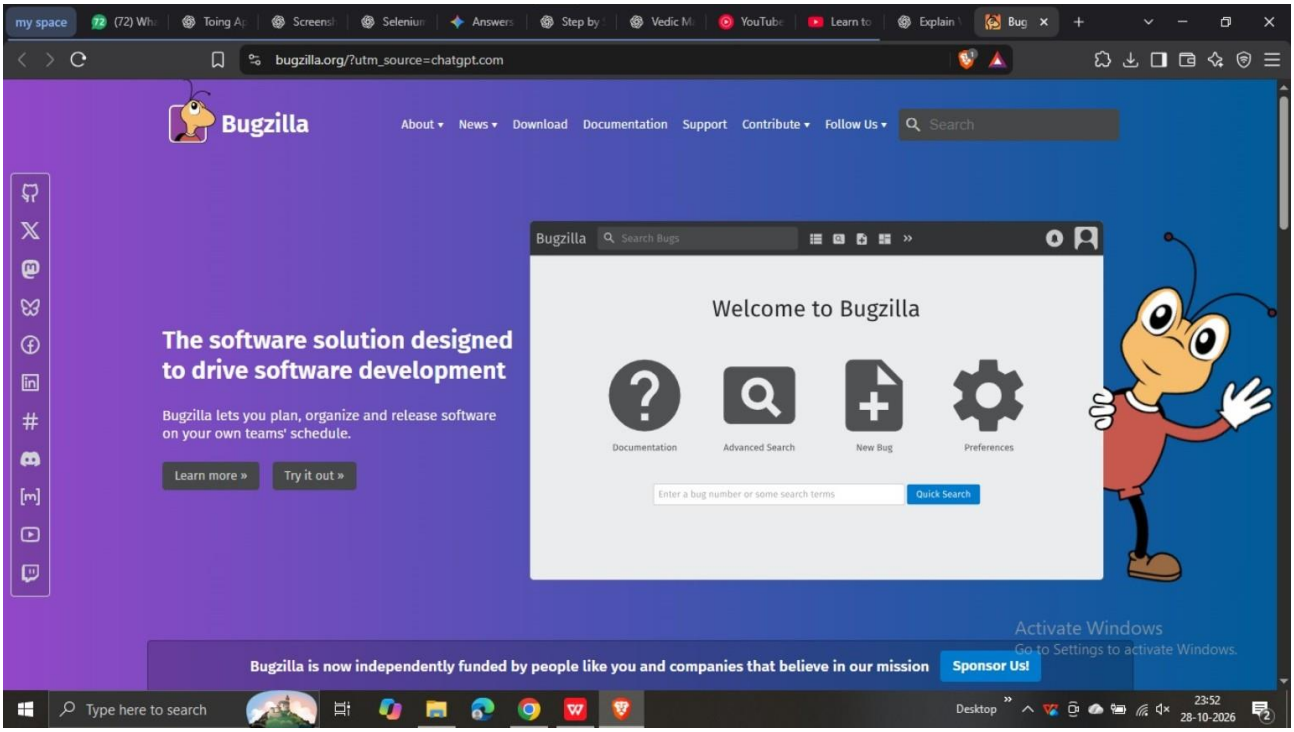

Actual result / evidence: Screenshot 4 shows Forum, Issues/Feature Request, LinkedIn and Twitter links, Help/Third Party Licenses/etc., the Oxygen XML Editor logo, and a copyright line for the TestLink Development Team 2013/2018.

Status: Observed in screenshot

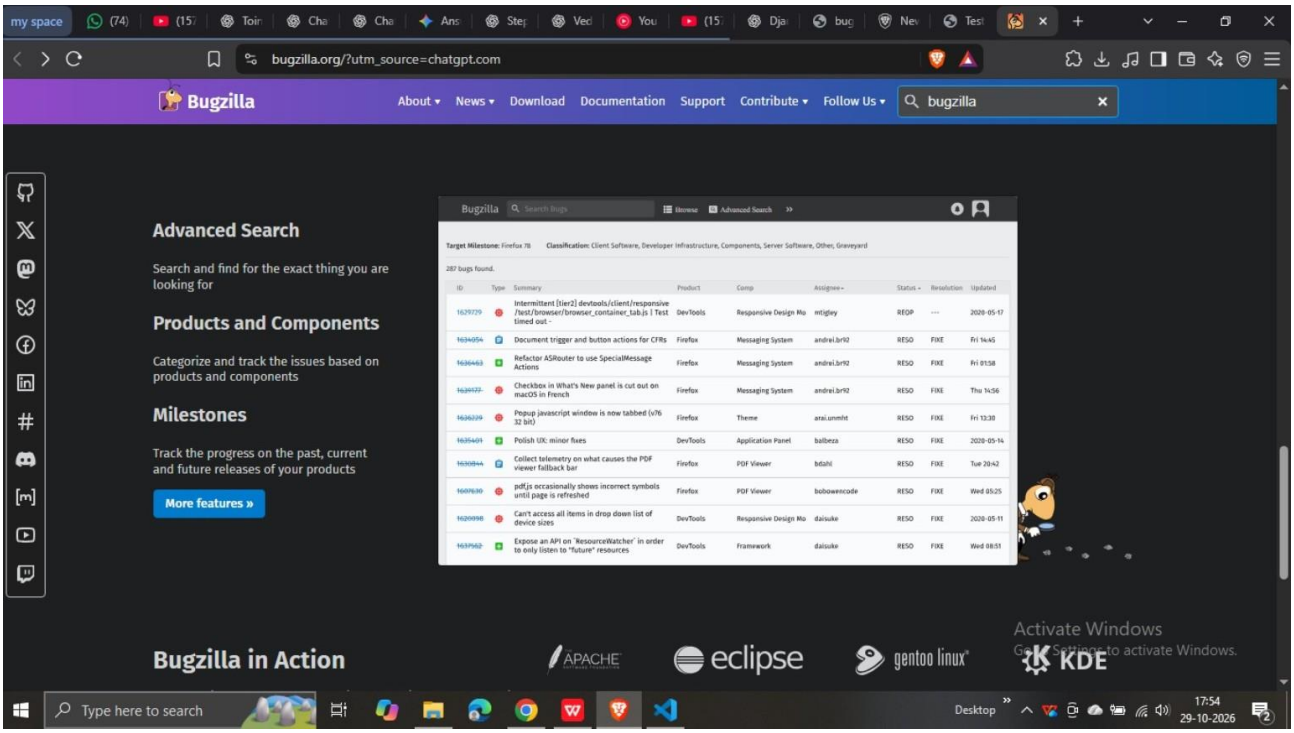

4. Screenshot Evidence — Sequence

The four screenshots are included in the order supplied. They show Bugzilla and TestLink pages. The images provide visual evidence only; they do not prove that search, bug submission, or every external link works.

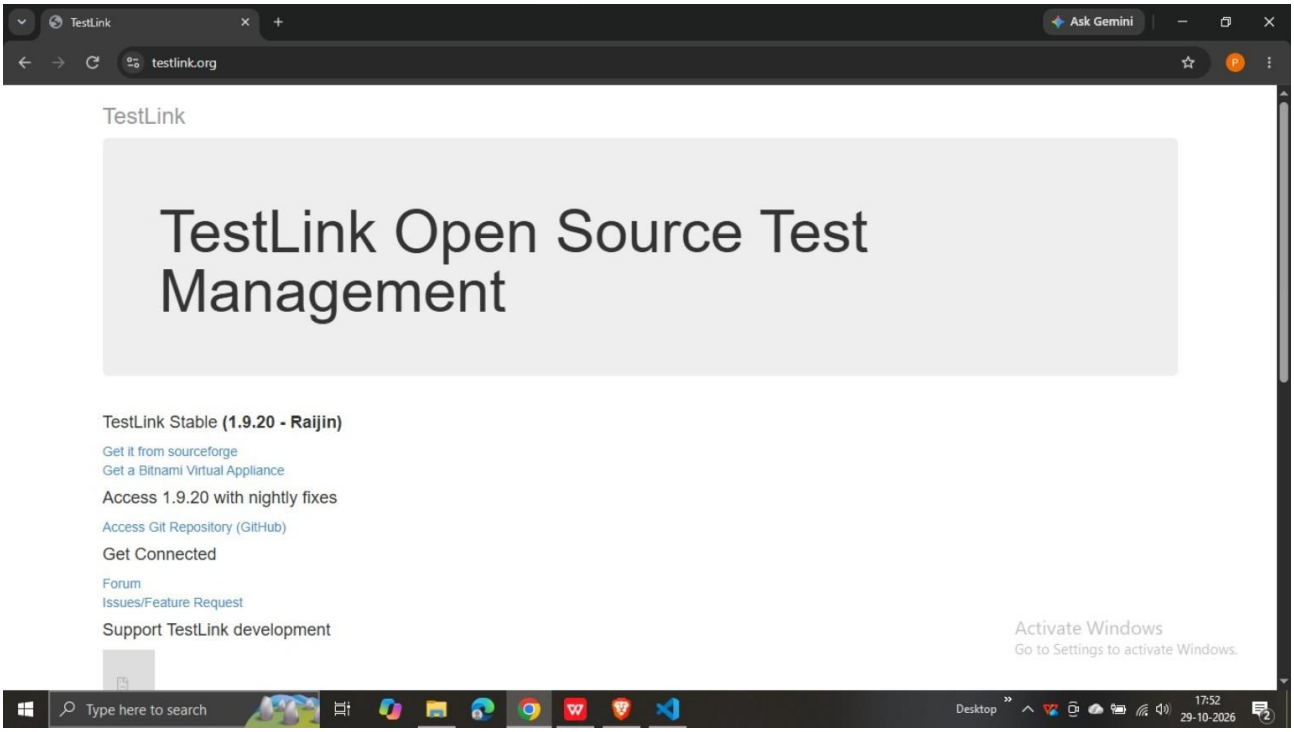

Screenshot 1 — Bugzilla home page

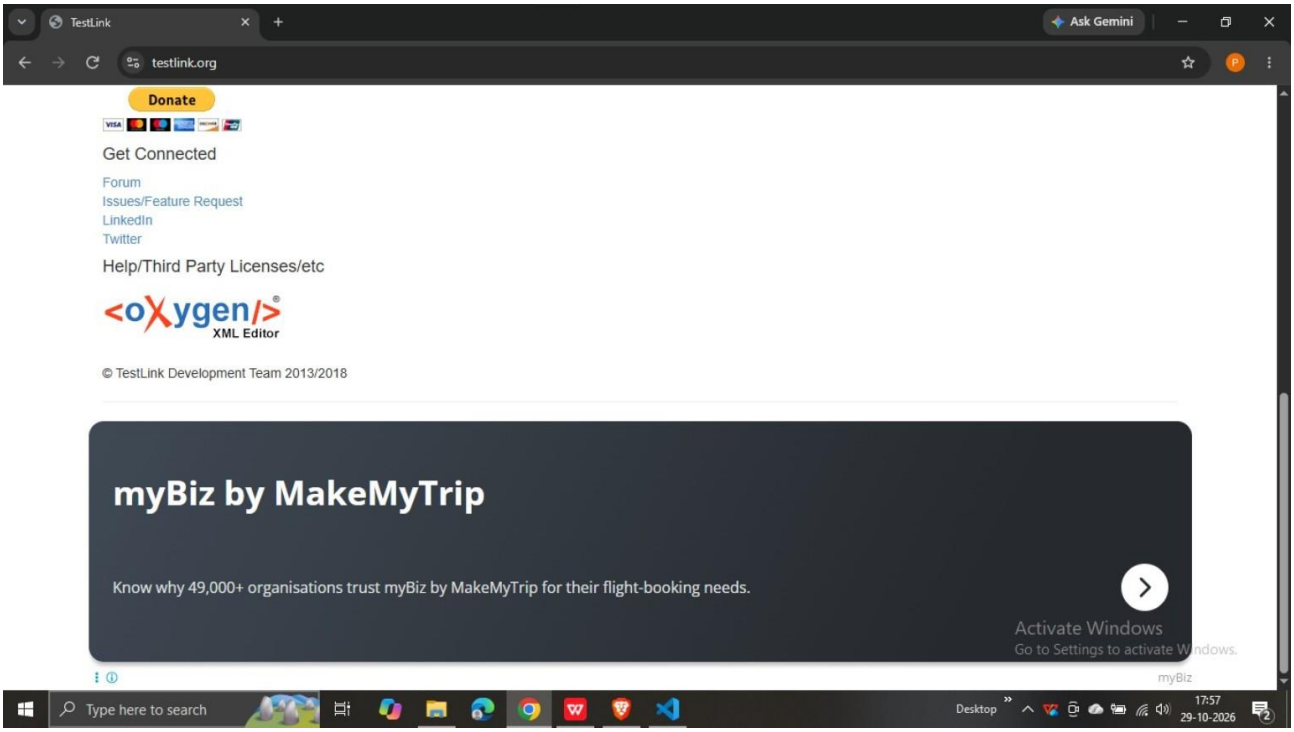

Screenshot 2 — Bugzilla Advanced Search and bug list

Screenshot 3 — TestLink Open Source Test Management home page

Screenshot 4 — TestLink page footer and support links

5. Summary of Test Results

Metric	Count	Notes
Scenarios documented	4	Bugzilla home/search and TestLink landing/footer screens
Screenshots reviewed	4	All four supplied screenshots

		included in the report
Confirmed UI failures	0	No confirmed defect can be classified from screenshots alone
Requires independent verification	3	Search behavior, issue/report workflow and TestLink links/navigation

6. Conclusion and Recommendations

The supplied screenshots show the Bugzilla home page, Bugzilla Advanced Search results, the TestLink landing page, and the TestLink footer/support links. They confirm that these UI states were captured, but do not establish that search operations, issue submission, or all links function correctly.

Recommendation: run a controlled test of the relevant search and issue-reporting workflows in an authorized test environment. Open the TestLink resource links that are part of the test objective and record the actual outcome. Capture before-and-after screenshots.

7. Bug Reports

No confirmed defect is identifiable from the supplied screenshots. Search functionality, bug creation/submission and link destinations need direct execution before they can be marked passed or failed.
