ORANGEHRM APPLICATION TESTING

Functional & UI Test Report | Tutorial 9

Evidence-based report prepared from the five supplied screenshots

1. Test Overview

Module Name	OrangeHRM Login, Dashboard, PIM and Employee Management
Test Case Group	TC-009
Tutorial	Tutorial 9
Tester Name	Not specified
Application / Pages	OrangeHRM Open Source Demo
Environment	Browser screenshots supplied; browser/OS versions not independently verified
Objective	Review the visible login, dashboard, employee list and add employee screens.

2. Prerequisites

- A browser is available to open the OrangeHRM demo application.
- The OrangeHRM login page can be opened.
- The user has suitable demo credentials for authorized testing.
- The supplied screenshots are available for visual review.

3. Test Scenarios and Results

Scenario 9a — Inspect Add Employee page

Test steps: 1. Open PIM.
2. Select Add Employee.
3. Review the name fields, Employee Id, profile image control, Create Login Details toggle and Save/Cancel buttons.

Expected result: The Add Employee form and its visible controls are displayed.

Actual result / evidence: Screenshot 1 shows the Add Employee page. The Employee Id field displays 0476; First Name, Middle Name and Last Name fields are visible. No employee name is entered.

Status: Observed in screenshot

Scenario 9b — Inspect Dashboard

Test steps: 1. Open the Dashboard.
2. Review Time at Work, My Actions, Quick Launch and dashboard widgets.

Expected result: The dashboard and its main panels are displayed.

Actual result / evidence: Screenshot 2 shows the OrangeHRM Dashboard with Time at Work, My Actions, Quick Launch, Buzz Latest Posts, Employees on Leave Today and Employee Distribution by Sub Unit panels.

Status: Observed in screenshot

Scenario 9c — Review invalid login message

Test steps: 1. Review the login page capture.
2. Check whether a login error message is visible.

Expected result: If invalid credentials are submitted, an appropriate error message is displayed.

Actual result / evidence: Screenshot 3 displays the message “Invalid credentials”. The screenshot alone does not establish which exact username/password combination was submitted.

Status: Error message observed; cause not independently verified

Scenario 9d — Inspect Employee List

Test steps: 1. Open PIM.
2. Select Employee List.
3. Review the employee search fields and available actions.

Expected result: Employee search filters and the employee list page are displayed.

Actual result / evidence: Screenshot 4 shows Employee Information search fields for Employee Name, Employee Id, Employment Status, Include, Supervisor Name, Job Title and Sub Unit, plus Reset, Search and Add controls. The page reports 126 records found.

Status: Observed in screenshot

Scenario 9e — Inspect OrangeHRM login page

Test steps: 1. Open the OrangeHRM login page.
2. Review the username and password fields and Login button.

Expected result: The login page shows fields for username and password and a Login button.

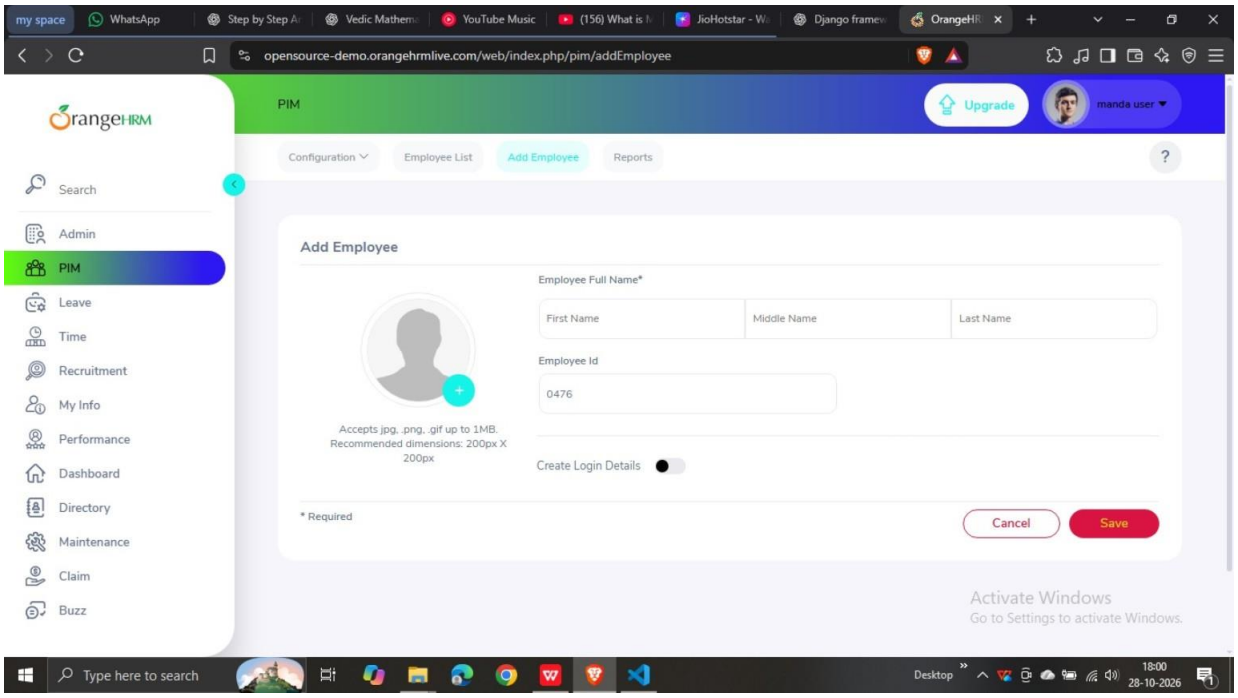

Actual result / evidence: Screenshot 5 shows the OrangeHRM login page and a visible demo-credentials hint (Username: Admin; Password: admin123). This screenshot does not prove that these credentials were successfully used.

Status: Observed in screenshot

4. Screenshot Evidence — Sequence

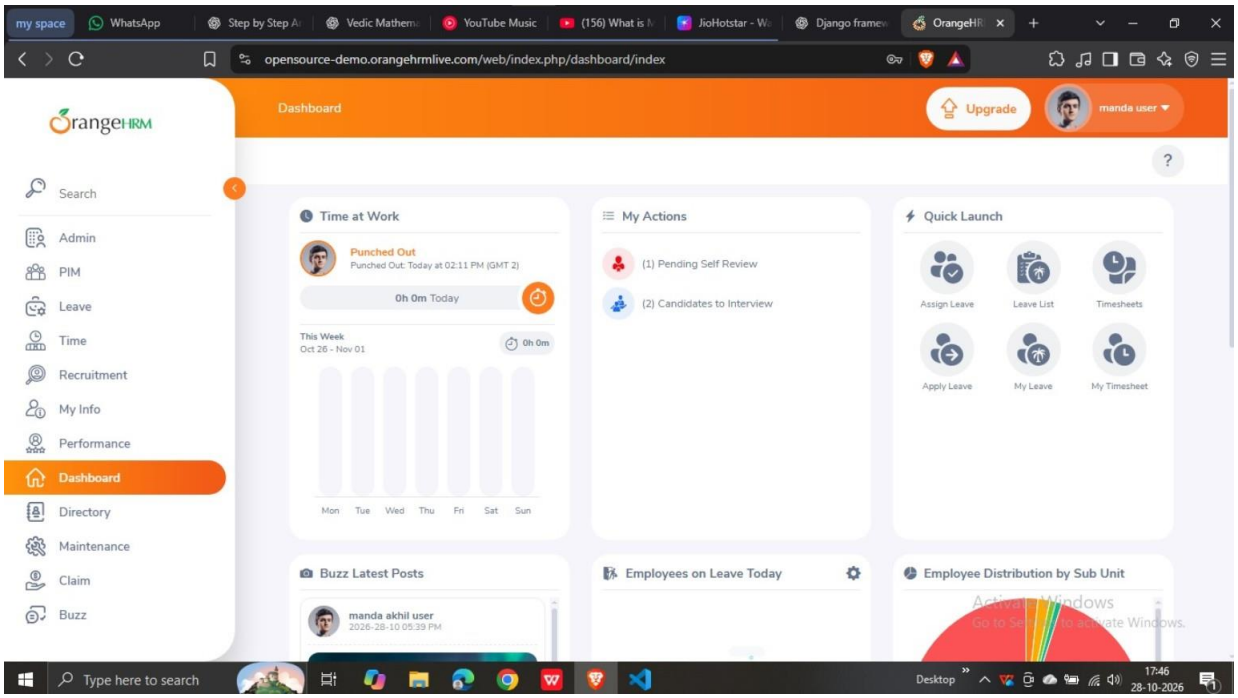

The five screenshots are included in the order supplied. They show different OrangeHRM pages and states. The images provide visual evidence only; they do not prove that all screens belong to one continuous end-to-end test run.

Screenshot 1 — Add Employee page

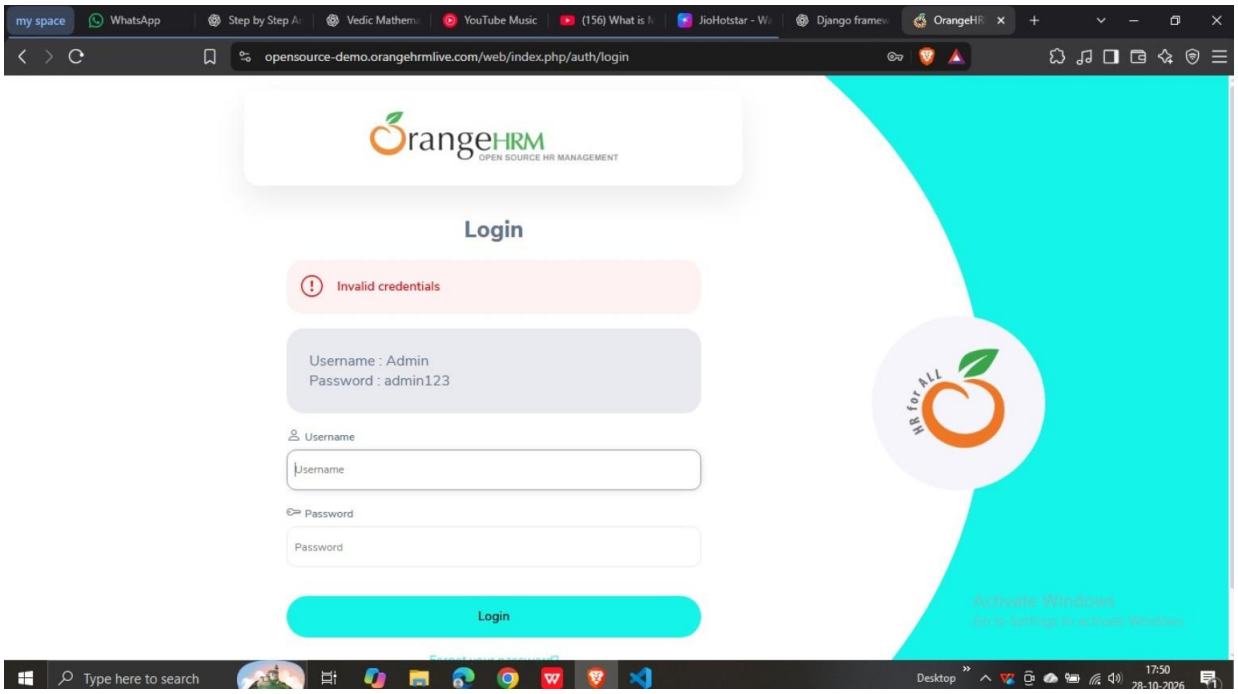

Screenshot 1 — Add Employee page

Screenshot 2 — Dashboard

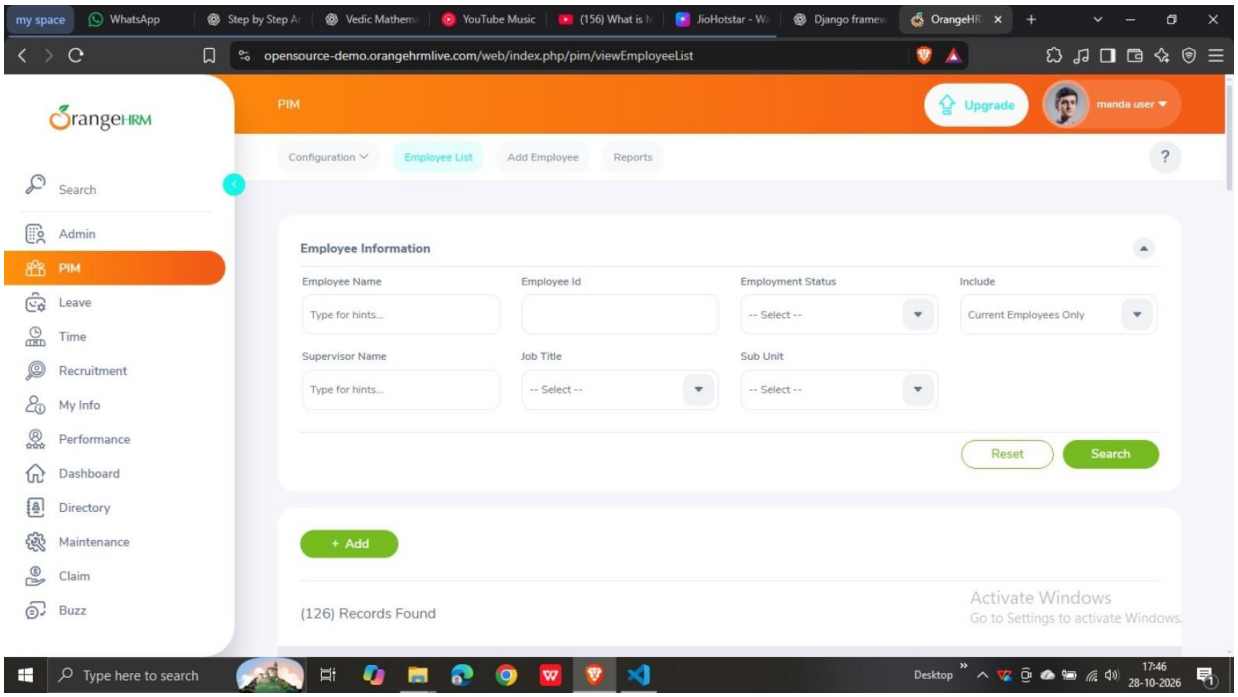

Screenshot 2 — Dashboard

Screenshot 3 — Login page showing invalid credentials

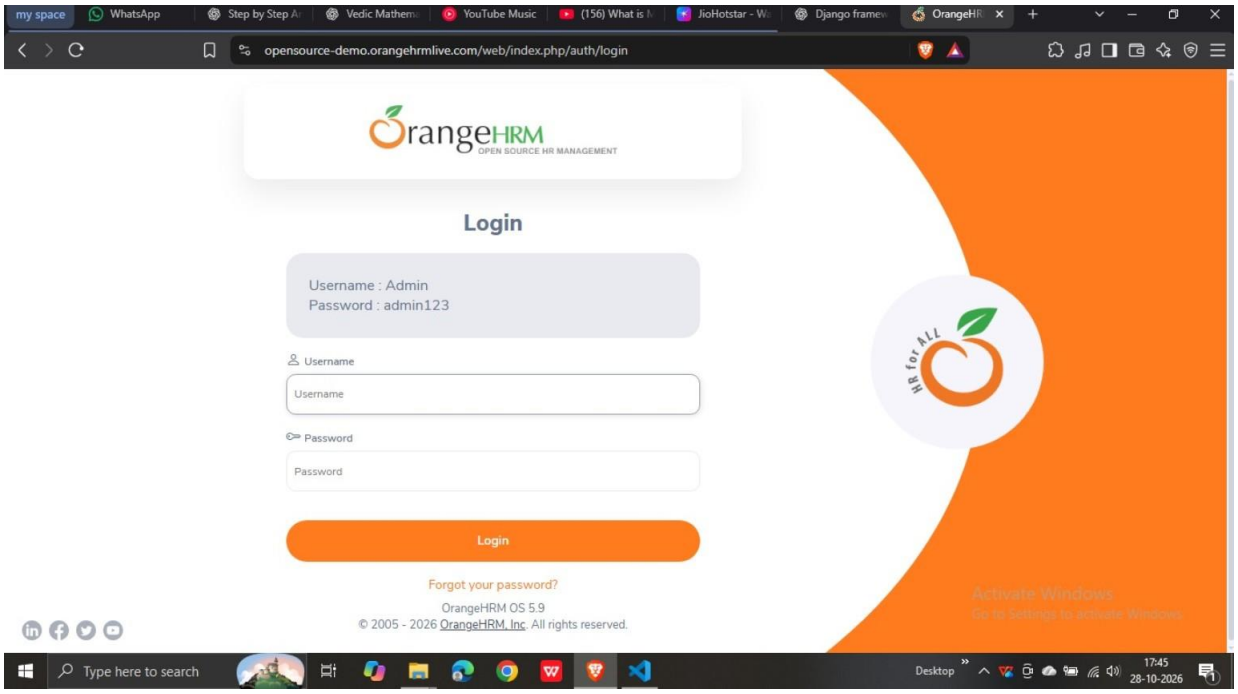

Screenshot 3 — Login page showing invalid credentials

Screenshot 4 — Employee List page

Screenshot 4 — Employee List page

Screenshot 5 — OrangeHRM login page

Screenshot 5 — OrangeHRM login page

5. Summary of Test Results

Scenarios documented	5	Login, dashboard, PIM employee list and Add Employee screens
Screenshots reviewed	5	All five supplied screenshots included in the report
Confirmed UI failures	0	No confirmed defect can be classified from screenshots alone
Items requiring independent verification	3	Successful login flow, employee save operation, and search/backend behavior

6. Conclusion and Recommendations

The supplied screenshots show the OrangeHRM login page, an invalid-credentials message, the dashboard, the Employee List page and the Add Employee form. These screenshots confirm that the displayed UI states were captured. They do not establish that an employee was saved successfully or that a complete login-to-employee-creation workflow passed.

Recommendation: run one clearly recorded test on the demo site. Log in with authorized demo credentials, open PIM, enter valid test employee data, save it, and verify the new record in Employee List. Record the browser/OS and capture the before-and-after screens. Avoid using real personal data.

7. Bug Reports

No confirmed UI defect is identifiable from the supplied screenshots. The invalid-credentials message is visible, but the attempted credentials and reason for rejection are not established. Employee creation, validation and search behavior require direct testing before they can be marked passed or failed.
